SAP Business One: Flexible, Integrated Solution

Every day over 80,000 customers rely on SAP Business One to manage every aspect of their businesses and keep their customers satisfied.

SAP Business One offers an all-in-one solution for complete business visibility and control, capturing crucial data for immediate decisions and actions across the company.

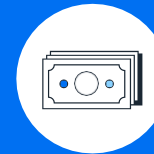

Built-in analytics and reporting make it possible to take fast decisions, with access to the most accurate and up-to-the-minute information.

Flexible for any business, it can be deployed on-premise or in the cloud, running on SAP HANA® or Microsoft SQL servers. Employees can start using it with ease with pre-configured package out-of-box best practices.

For international expansion, SAP Business One supports 28 languages and 50 country-specific versions, with local support from over 850 partners.

Why 80,000 customers already run SAP Business One around the world?

Affordable low total cost of ownership

Super Quick and easy to implement

Comprehensive all your departments needs

Powerful to help your business grow

Industry solutions tailored

850+ local partners

International expansion ready

28 languages

Robust ERP Solution

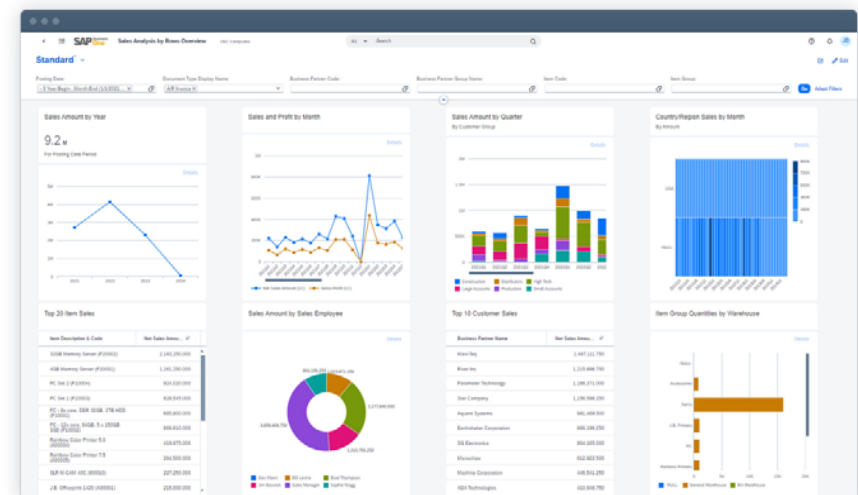

Intuitive, User-friendly Interface

SAP Business One Web Client features a user-friendly web interface aligned with SAP Fiori design principles. It integrates the core business processes and functionalities of SAP Business One with advanced analytics and integration capabilities, making it an ideal companion for your business's future growth.

With flexible deployment options that don't require a special license, it seamlessly interacts with SAP Business One company databases.

Get all your business relevant information in one glance, manage your notifications, create and manage sales orders, business partners or products easier than ever, with advanced analytics to have all the insights you need to manage your business and make your life easier.

- Streamline your Financial Operations
- Maximize Sales
- Efficient Procurement
- Effortlessly Manage Warehouse, Inventory and Pricing

Streamline your Financial Operations

SAP Business One streamlines financial operations by automating accounting tasks, managing multi-currency transactions, and supporting tax calculations. It handles banking activities and reconciles accounts.

By integrating financial operations with purchasing and sales in real-time, it enhances transaction speed and cash flow visibility.

Financial Management

Accounting: automatically handle all key accounting processes, such as journal entries, accounts receivable, and accounts payable.

Banking and reconciliation – quickly process reconciliations, bank statements, and payments by various methods including checks, cash, and bank transfers

Financial reporting and analysis – create standard or customized reports from real-time data for business planning and audit reviews.

Maximize Sales

SAP Business One offers tools to manage the entire sales process and customer lifecycle efficiently, from initial quote to cash. Its integrated functionality provides a complete view of customers, helping you boost sale and profitability, and enhance customer satisfaction.

Sales and customer management

Sales management

Track activities from the first contact to invoicing.

Reporting and analysis

Create detailed reports on all aspects of the sales process, using time saving templates.

Customer management

Store all critical customer data in one place.

Mobilize your sales team

Manage your sales information on the move with SAP Business One Web client.

Simplify Procurement

SAP Business One streamlines the entire order-to-pay cycle for small and mid-sized businesses, managing vendor quotes, purchase requests, and payments. Integrated reporting tools enable supplier comparison for better deals and cost savings.

Purchasing and inventory control

Procurement

- create purchase requests, POs, and goods receipts; link purchasing documents and view document trails for audit purposes; and manage returns, additional expenses, and multiple currencies.

Master data management

- manage detailed data in a user-friendly interface, view account balance and purchase analyses, and maintain detailed item purchasing information with price lists and tax information.

Warehouse and accounting integration

- achieve real-time synchronization of goods receipts and inventory warehouse levels; process accounts payable invoices, cancellations, and credit memos with a PO reference; plan your material needs; and schedule your purchases accordingly

Easier, up-to-date reporting

- generate reports with real-time data and display them in various report formats or dashboards.

Effortlessly Manage Warehouse, Inventory, and Pricing

SAP Business One tracks inventory, and item locations within warehouse accurately. It supports various costing methods, real-time stock monitoring, and seamless transfer tracking. Manage pricing strategies, apply discounts, and generate insightful reports effortlessly.

Warehouse and Inventory

Warehouse and inventory management

manage inventory using various costing models, maintain item master data, and use multiple units of measure and pricing.

Bin location management

manage stock in multiple warehouses, by dividing each one into multiple subzones, set up allocation rules, optimize stock movement, and reduce picking times.

Goods receipt and issue control

record goods receipts and issues; track stock locations and transfers; enable consignment, drop-ship, and other orders; and perform inventory and cycle

Efficient reporting

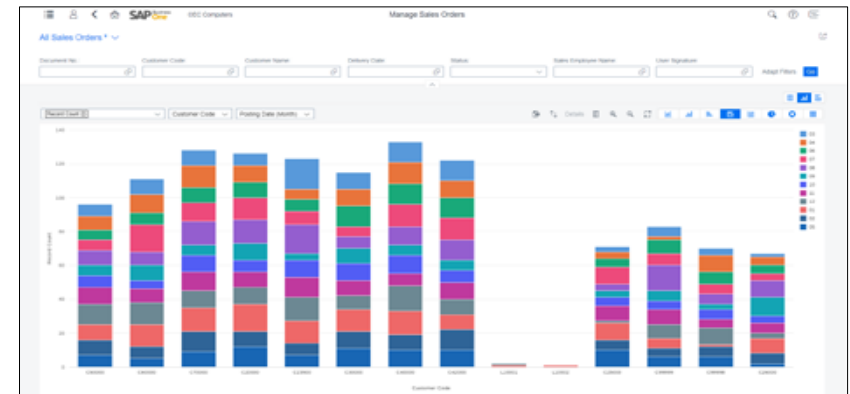

generate reports with timely data and display them in various formats or dashboards.

See your entire business clearly. Take swift, informed actions

SAP Business One offers advanced built-in analytical capabilities as well as sophisticated complementary tools allowing you to instantly gain business insights that support optimized decision making.

SAP Business One Web Client Analytics – built-in sophisticated filtering and visualization capabilities support creating reports and charts on the fly, manage User-Defined Queries (UDQs) effortlessly, and reach the next level of contextual real-time analytics using linked views.

SAP Crystal Reports for SAP Business One enables you to create dashboards and reports to gain insight into all business areas. Intuitive, interactive drill-down functionality helps you get answers to your most pressing questions.

SAP Business One, version for SAP HANA Analytics - powerful analytics in real time for even faster information access, making it easier for users to search for the required information and create standard or ad hoc reports on the fly.

Flexible Deployment Options

One-Premise

Choose to deploy SAP Business One in your office with tailored solutions to meet your specific needs.

Cloud

Deploy SAP Business One in the cloud through partner-hosted options, ensuring scalability
